

Aladdin Middle East Performance Review

Objective: Prove the LCM capabilities of the MUDLINK lower end assembly.

Performance: The MUDLINK system was selected for this well due to the high chance of major losses throughout multiple formations.

The LCM used by the operator was able to abstain losses while still unable to plug off the MUDLINK tool, saving multiple trip events and completing the job ahead of schedule.

As shown in picture below, the operator pumped LCM of excess 100 lbs/bbl with all materials available on site.

Country:	Turkey
Operator:	Aladdin Middle East
Field:	East Sadak
Well Profile:	Vertical
Hole Size:	12.25",8.5"
Tool Size:	8",6.5"
Start Depth:	442m
End Depth:	2392m
WOB:	35 KLBS
Mud Wt:	8.8 PPG
YP:	25
PV:	15
Mud Type:	Gel/Chem
BHA Type:	Conventional
Flow Rate:	400-600 GPM
Circulating:	505 Hours
